

破碎钳
CRUSHERS

CR

Designed to face the toughest demolition operations, the CR best features are power and durability, enabling fast, precise and safe demolitions.

Construction Cases

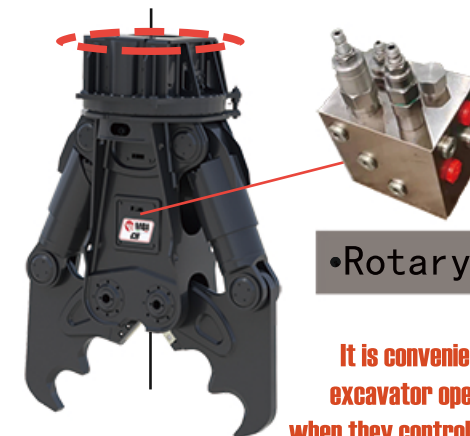

Mantovanibenne

CR15A&CR20A

The two products mainly carry out the following upgrades:

1. The carrier and excavator joints adopt an integrated;
2. Using stronger materials;
3. The opening is larger and the jaw teeth are longer, but the quality remains the same;
4. Using a large oil cylinder, the tool bite force is greater;
5. Patented automatic rotary valve.

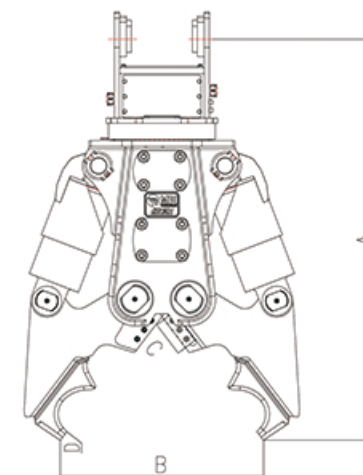

•Rotary Valve

It is convenient for excavator operators, when they control the cutter opening, they can also make the cutter revolving.

Technical parameter

MODEL	CR15A	CR20A
Overall Length/mm	2000	2085
Max Opening/mm	1000	1100
Cutter Length/mm	175	175
Tip Crushing Force/KN	700	1080
Central Crushing Force/KN	1083	1610
Excavator Weight/t	14-18	18-24
Working Pressure/bar	320-350	320-350
Working Flow/ (L/min)	130-150	180-220
Overall Weight/KG	1530	2100
